WHY HERE?

Here you will find my artistic expression in the form of photographs.
Architecture, landscapes and lifestyles.
The best shots, brought together in this portfolio, allow you to immerse
yourself in the same emotions I experienced during my travels around
the world.
Different cities and cultures, “captured” by my Sony.

02 About ME

"Where Space Meets Motion: The Eye of a Designer, the Soul of a Photographer."

I am Michele Filippini, a 37-year-old Italian creative with a foundational background in interior design, architecture, and restoration. This technical training shaped my understanding of light, volume, and structure—elements that I now translate into my visual storytelling. For years, I have dedicated my career to photography and filmmaking, with a specialized focus on the automotive world. My work explores the synergy between engineering and aesthetics.

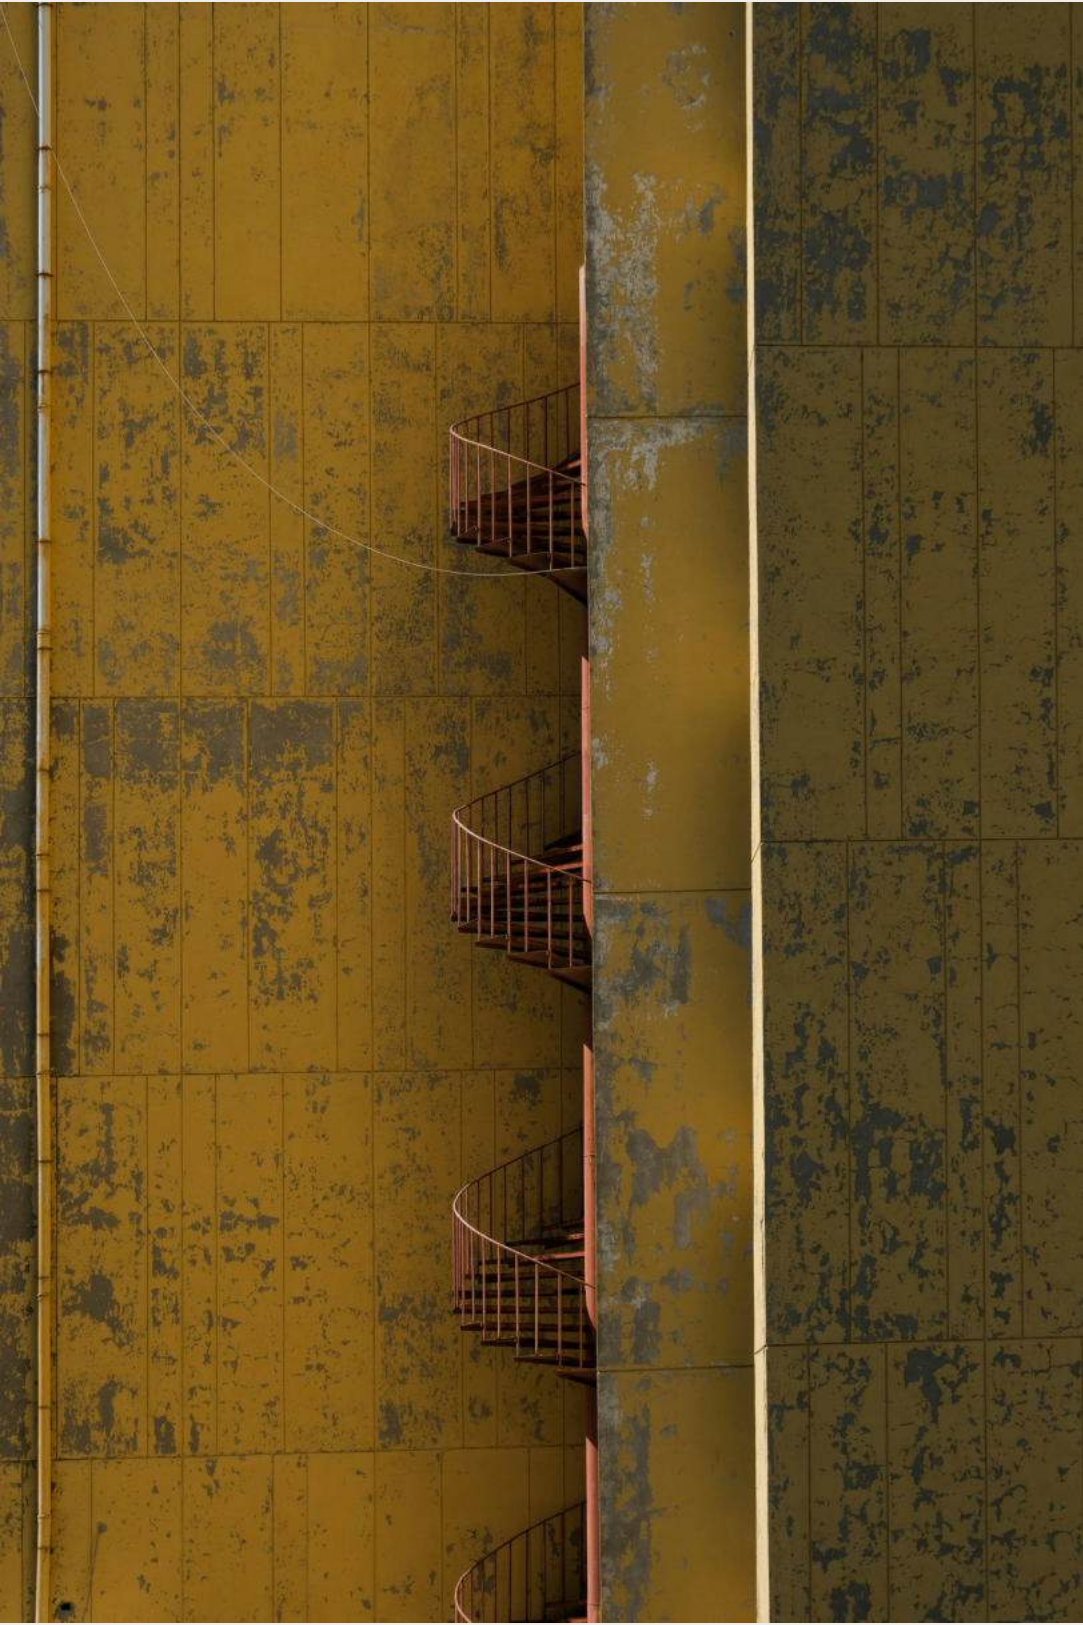

Beyond the track and the studio, my travels have allowed me to expand my vision toward urban architecture, nature, and street art. Whether I'm capturing the sleek lines of a car or the raw energy of a city street, my goal is to document the character and history of every subject I frame.

08 different Application

"While my portfolio highlights a passion for travel, my professional expertise extends far beyond global landscapes. I specialize in commissioned commercial photography and cinematographic production, including short films, commercials, and brand storytelling. I bring a documentary eye to professional projects, delivering high-quality visual content tailored to client needs."

10 (CTA) Call to Action

Ready for the Next Narrative?

From the open road to the studio, every project is a unique journey.
